|--|
| Ramp up of Elgin Franklin rates not expected till this evening. |
| Ramp up of Elgin Franklin rates not expected till this afternoon. |
| Reduced export levels from Elgin Franklin for planned rig move. Rates at SEAL forecast to reduce from 1700 by 1800 steady at around 2.5 MCM/D, Elgin Franklin gas at Perenco forecast to reduce from 1.8 MCM/D to 0.7 MCM/D. |
| Reduced delivery at NSMP from Alwyn and Laggan Tormore. |
| Reduced production on Culzean due to planned maintenance. Rates may vary during this time. |
| Laggan Tormore has restarted, flows ramping up. |
| Laggan Tormore export due to stop later this afternoon for a planned outage export expected to restart on Friday. |
| Elgin Franklin ESD testing planned to start later this morning. Rates at SEAL will drop from current rates of 5.3 MCM/D to 2.3 MCM/D for approx 12 hours. Ramp up to previous rates will take approx 10 hours. Elgin Franklin gas at Perenco forecast to drop from 2.2 MCM/D to 1.0 MCM/D. |
| Elgin Franklin production has restarted, currently forecast to restart delivery at Bacton SEAL at 2300 at ~ 2.0 MCM/D. The rig move has been completed so normal rates expected during gas day 31-Aug-2024. |
| Elgin Franklin restart under way, gas export from Elgin not expected until 2100 tonight. |
| Elgin Franklin has tripped. Flows from Bacton SEAL will go to zero from 16:00 hrs and restart is currently unknown. |
| Reduced Elgin Franklin production due to a rig move. Rig move is weather dependent. Flows from Bacton SEAL will start to reduce from 20:00 hrs. Approximately 1 MCM/D of Elgin Franklin gas going to the Perenco terminal will stop at the same time. |
| Laggan Tormore delivery for gas day 12-Aug-2024 0.5 MCM/D. |
| Laggan Tormore delivery for gas day 11-Aug-2024 0.5 MCM/D. |
| Laggan Tormore delivery at St Fergus to stop for approx 4 days. |
| Alwyn delivery at St Fergus reduced for a period. Rates to technical capacity from 2000. |

| |
|---|
| Alwyn delivery at St Fergus reduced for a period. |
| Laggan Tormore delivery at St Fergus to stop for approx 4 days. There has been a delay, there will be a nomination of approx 1.7 MCM/D from 1500 today. |
| Laggan Tormore delivery at St Fergus to stop for approx 4 days. |
| Laggan Tormore restart will be delayed to allow for pigging works. |
| Planned maintenance. |
| Elgin Franklin ramp up is now complete. |
| Elgin Franklin ramp up is delayed. |
| Elgin Franklin ramp up is delayed. A return to normal production levels will occur during gas-day 11th May. |
| Elgin Franklin ramp up is delayed. A return to normal production levels will occur during gas-day 10th May. |
| Elgin Franklin rates expected to return to normal levels during gas-day 9th May. |
| Elgin Franklin rates will continue to fluctuate during this period. The work is weather dependent. |
| Elgin Franklin has reduced its export rate and rates at Bacton SEAL should start to reduce from midnight and will drop to a rate of approx 3 MCM/D. The reduction is due to last up to 72 hrs. The work is weather dependent. There will be reduced blending gas provided to the Boreas terminal during this period. |
| Elgin Franklin has reduced its export rate and rates at Bacton SEAL should start to reduce from midnight and will drop to a rate of approx 3 MCM/D. The reduction is due to last up to 72 hrs. The work is weather dependent. There will be reduced blending gas provided to the Boreas terminal during this period. |
| The weather window has closed, Elgin Franklin delivery at Bacton SEAL will remain at current rate of ~ 5.0 MCM/D. No new data currently available. |
| Elgin Franklin is expected to reduce its export rate later today. The rates at Bacton SEAL should start to reduce from mid afternoon and by evening be at a rate of approx 2.7 MCM/D. The reduction is due to last between 24 to 26 hrs. The work is weather dependent. There will be reduced blending gas provided to the Boreas terminal during this period. |
| Maintenance at Laggan Tormore expected to complete today 18th. |
| It's hoped to start the pigging on Friday or Saturday. |
| Laggan Tormore shutdown for pigging, Ramp up expected on 18th May with rates of approx 2.6 MCM/D from |
| Laggan Tormore shutdown for pigging, Ramp up expected on 17th May with rates of approx 2.6 MCM/D from |
| Laggan Tormore shutdown for pigging, Ramp up expected on 16th May with rates of approx 2.6 MCM/D from |
| Laggan Tormore shutdown for pigging, subject to weather. |
| Laggan Tormore restart will be delayed to allow for pigging works. |
| Planned maintenance. |

| |
|---|
| Culzean production did restart yesterday, delivery from CATS expected this morning. |
| Production planned to restart today with ramp up to normal flows during gas-day 2nd July. |
| Production planned to restart overnight with ramp up to normal flows during gas-day 2nd July. |
| Delay in restart of Culzean from planned maintenance, production restart planned for Monday (1st July) dayshift with ramp up to normal flows. |
| Delay in restart of Culzean from planned maintenance, production restart planned for Sunday (30th) dayshift with ramp up to normal flows. Some Culzean gas approx 0.5 MCM/D maybe delivered today (29th) |
| Delay in restart of Culzean from planned maintenance, production restart planned for Sunday (30th) dayshift with ramp up to normal flows. Some Culzean gas approx 0.5 MCM/D maybe delivered today (29th) |
| Delay in restart of Culzean from planned maintenance, production restart planned for Saturday (29th) evening with ramp up to normal flows. Some Culzean gas approx 2.0 MCM/D maybe delivered today (27th) from linestock |
| Planned maintenance, there will be a ramp down prior to the start date. Restart dependent on third party m |
| Elgin Franklin delivery at Bacton SEAL forecast to start from 2200 at ~ 3.0 MCM/D |
| Elgin Franklin delivery at Bacton SEAL forecast to start from 2200 at ~ 3.0 MCM/D |
| Elgin Franklin has restarted. |
| Elgin Franklin restart delayed. |
| Elgin Franklin has had to shutdown due to an issue. Restart delayed. |
| Elgin Franklin has had to shutdown due to an issue. Restart delayed for ~24 hours. |
| Elgin Franklin restart process under way, export expected later this gas day. |
| |
| Following a trip on Elgin Franklin flows to National Grid have stopped at approx 2330 on the 31st July for the planned maintenance works. |
| Elgin Franklin flows at Bacton SEAL will be zero due to planned terminal maintenance. Approximately 2.5 MCM/D of Elgin Franklin gas going to the Perenco terminal will stop at the same time. Ramp up period following maintenance TBC |
| Elgin Franklin flows at Bacton SEAL will be zero due to planned terminal maintenance. Approximately 2.5 MCM/D of Elgin Franklin gas going to the Perenco terminal will stop at the same time. Ramp up period following maintenance TBC |
| Liquid export route is unavailable due to planned maintenance, therefore no gas export from Elgin Franklin. Approximately 2.5 MCM/D of Elgin Franklin gas going to the Perenco terminal will stop at the same time. Ramp down/ramp up timings TBC |
